

Photo Booth

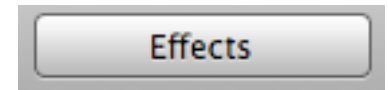

1. Open Photobooth from applications.

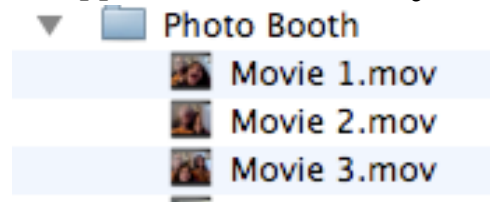

2. You can take 1 picture, a series of 4 picture, or take a video.

3. You can also add different effects to the picture or video.

4. When you want to insert these pictures or video into a document, email, PowerPoint, podcast, or movie, they will appear in the finder in your "pictures" window in the "Photo Booth" folder.

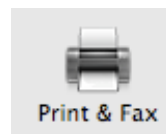

Printer setup

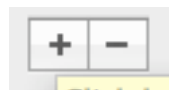

1. Choose "System Preferences" from the dock.

2. Click the "Print & Fax" button.

3. Click the plus on the bottom left.

4. Choose "IP" from the new window.

5. In the "address" box, type in the number that is on the front of the printer.

6. In the "name" box, type in the room number where that printer is located.

7. Click "add" then "continue".
